52066ba	Navbar dark transparent on scroll Initial scroll fix - 1 file, +26 / -14 lines
0f53290	Navbar glassy transparent on scroll Refined glassy look - 1 file, +15 / -7 lines

Changes Delivered

FEATURE Full Arabic Translation - Homepage + Contact + WhatsApp

Homepage sections (hero, services, FAQ, CTA, about, map), contact page form/labels, WhatsApp button - all switch to Arabic with RTL support when language toggle is used. Translations stored in lib/i18n/translations.ts.

BUG FIX Hydration Crash Fix - LanguageProvider Rewrite

Rewrote LanguageProvider from React Context to useSyncExternalStore pattern. Eliminated hydration mismatch that caused blank page on load. Provider component is now a passthrough - components call useLocale() directly.

BUG FIX Social Media Links - Facebook + LinkedIn

Fixed broken Facebook link to alhayacleandubai. Replaced X/Twitter with LinkedIn profile. Updated Header, Footer, and SEO sameAs schema in lib/utlis/seo.ts.

UI FIX Light Theme Text Visibility - Entire Website

Fixed white/light text invisible on light background across all pages: contact page, home service cards, why section, FAQ, map section, CTA stats. Added global Tailwind class overrides for text-white, text-gray-300/400/500 in main content area.

UI FIX Hero Sub-headings Visibility + Image Shade

Added white shade overlay on hero images. Made sub-headings bold black so they are readable over the images in light

theme.

UI FIX **Navbar Glassy Look Preserved on Scroll**

Navbar now keeps the same frosted glass transparent gradient when user scrolls down - no more solid white/dark background switch. Applies to desktop + mobile + dropdown menus.
